

Institute of Physics, popularly known as IoP, is a well-known dedicated resource of high quality information in physical sciences. The Institute has a world-wide membership and is a major international player in scientific publishing and electronic dissemination of physics, setting professional standards for physicists and awarding professional qualifications, promoting physics through scientific conferences, education and science policy advice. The IoP electronic database comprises of journals on various topics like bio-inspiration, biometrics, biomedical materials, astronomy, astrophysics, chemical physics and theoretical physics. Member of N-LIST Programme can access IoP archive consisting of 49 journals (including 7 in open access) from Vol.1 issue.1 onwards.

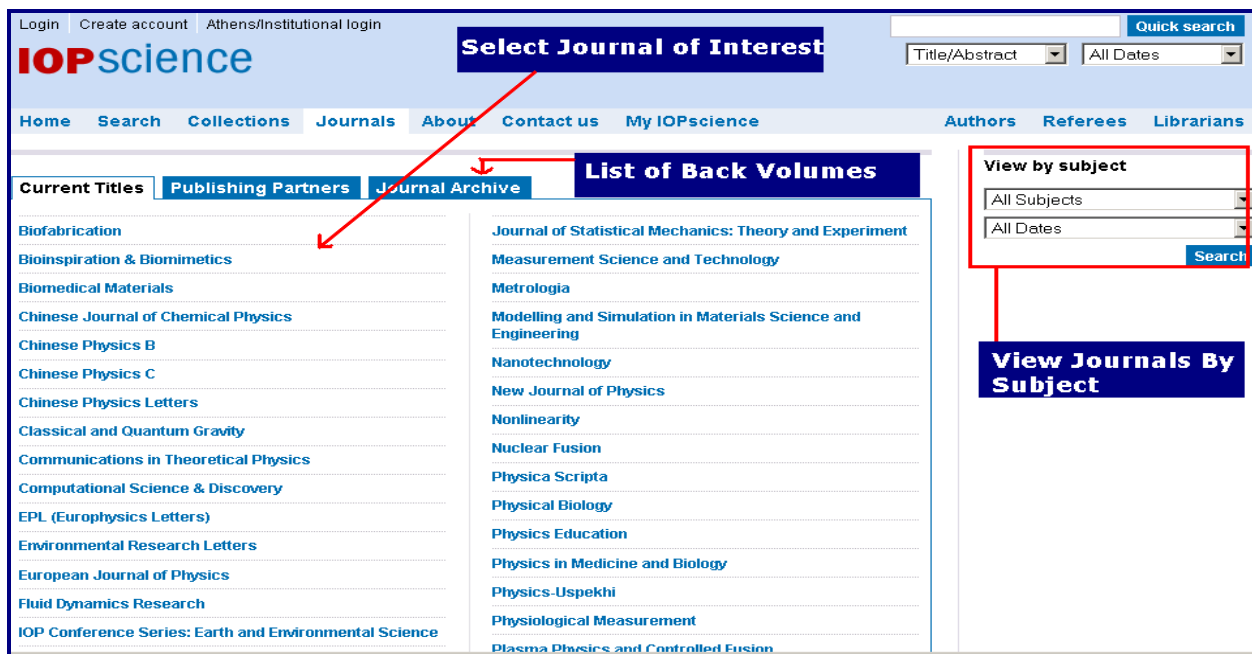

Browse

To browse the IOP electronic journals, click on **Journals** option from navigation bar as shown below:

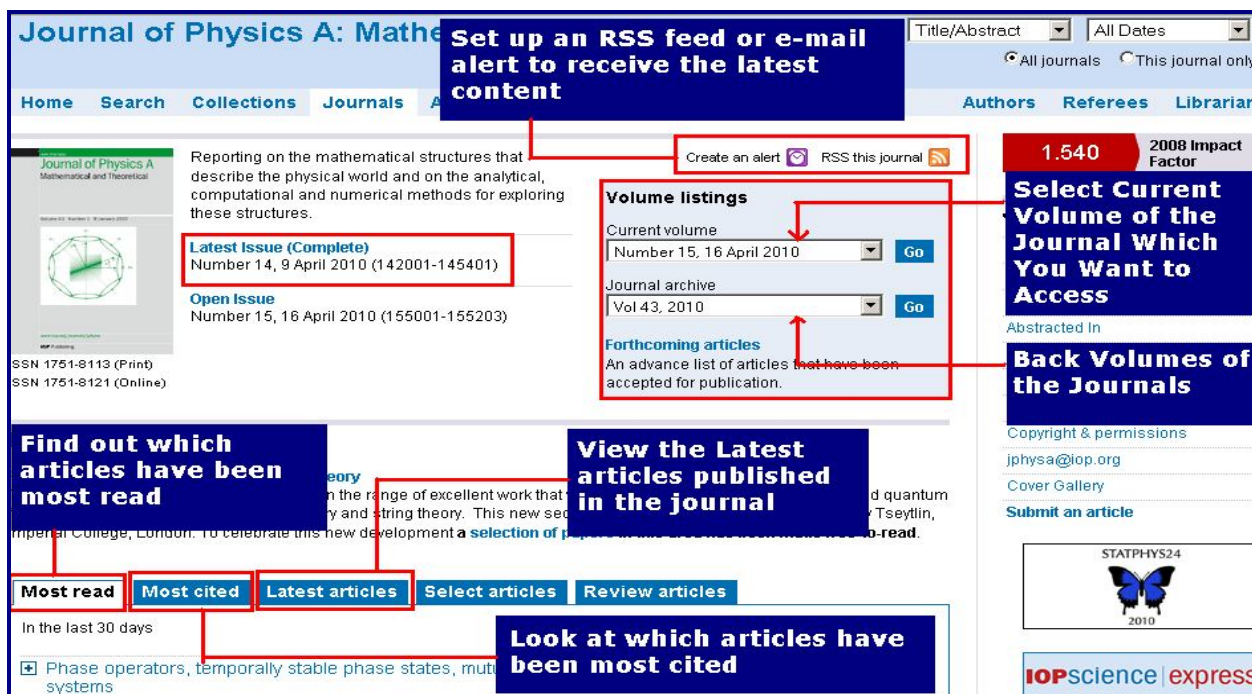

The screenshot shows the IOPscience website interface. At the top, there are links for 'Login', 'Create account', and 'Athens/Institutional login'. The main navigation bar includes 'Home', 'Search', 'Collections', 'Journals', 'About', 'Contact us', 'My IOPscience', 'Authors', 'Referees', and 'Librarians'. The 'Journals' link is highlighted with a red box, and a blue callout box with white text says 'Click Here For Browse Journals'. Below the navigation bar, there is a 'Quick search' section with a search box and a 'Search now' button. A 'Welcome to IOPscience' message is displayed, along with links for 'Find out more', 'Download a user guide', and 'Take an online tour'. A section for 'New iPhone apps' is also visible. On the right side, there is a 'View by subject' section with dropdown menus for 'All Subjects' and 'All Dates', and a 'Find content' section with a 'Select a Journal' dropdown and input fields for 'Vol/Year', 'Issue/Month', and 'Page/Article #'. At the bottom, there is a 'Latest articles' section with tabs for 'Latest articles', 'Most read', 'Most cited', and 'Latest news'. Two articles are listed: 'The 12th International Workshop on Desorption Induced by Electronic Transitions (DIET XII) (Pine Mountain, Georgia, USA, 19–23 April 2009)' and 'Radio-frequency performance of a sub-100 nm metal-oxide field-effect transistor with high-k gate dielectric'.

* Do not log on to the URL directly. First log on to N-LIST website with your user ID and password, and then select Institute of Physics for accessing its journal.

Clicking at "journals", a user will be given three options, namely, i) current journal list; ii) view by subject; and iii) archives. A screenshot of current journals arranged alphabetically is given below:

To view content of a journal, click on the journal name e.g. **Journal of Physics A: Mathematical and Theoretical**. On clicking at the journal name, a user will get screen as shown below. Home page of journal provides option to view most read, most cited or latest articles. A user can access either current journals or back journals, select appropriate option as shown below:

Select appropriate option to view abstract or full-text PDF / HTML articles as shown below. Select "This journal only" option from Quick search and enter term in text entry box to search within this journal.

The screenshot displays the IOPscience website interface for the Journal of Physics A: Mathematical and Theoretical. At the top, there are navigation links for 'Home', 'Search', 'Collections', 'Journals', 'About', 'Contact us', and 'My IOPscience'. A search bar is located at the top right with a 'Quick search' button. Below the search bar, there are dropdown menus for 'Title/Abstract' and 'All Dates', and radio buttons for 'All journals' and 'This journal only'. The main content area features a 'Table of contents' section with two articles. The first article, 'Delay induces quasi-periodic vibrational resonance' by J H Yang and X B Liu, has a DOI of 10.1088/1751-8113/43/12/122001. It offers options to 'View as HTML' and 'Full text PDF (639 KB)'. A blue callout box points to the PDF option with the text 'Access Full-Text in PDF Format'. The second article, 'Rogue waves, rational solutions, the patterns of their zeros and integral relations' by Adrian Ankiewicz, Peter A Clarkson and Nail Akhmediev, has a DOI of 10.1088/1751-8113/43/12/122002. It offers options to 'View as HTML' and 'Full text PDF (240 KB)'. A blue callout box points to the HTML option with the text 'Access Full-Text in HTML Format'. A red box highlights the 'Abstract' link for the second article, with a blue callout box pointing to it that says 'View Abstract of Article'. On the right side, there is a 'Journal links' section with various links like 'Journal home', 'Scope', 'Editorial board', etc., and a 'View by subject' section with dropdown menus for 'All Subjects' and 'All Dates', and radio buttons for 'All journals' and 'This journal only'.

Search

IOP facilitates four types of search, namely i) Content finder; and ii) Quick Search iii) PACS/MSC Search and iv) Advance Search

1. Find Content

The Find Content is a flexible tool, which can be used to find articles or groups of articles in a number of quick and easy ways. Content finder can be found at the right hand side of every page.

Find content

Select a Journal ▼

Vol/Year:

Issue/Month:

Page/Article #:

Search

2. Quick Search

Quick Search is located at homepage or from the top right of every page. The default is set to search all fields, but user can narrow it down by title/ abstract, author, affiliation and/or full text, as well as date range. User can also restrict their search by selecting period from drop down menu.

Quick search

Search now

View by subject

All Subjects

3. PACS/MSC Search

PACS is a hierarchical subject classification scheme for physics and astronomy, which provides an essential tool for classification and efficient retrieval of literature in physics and astronomy. While MSC codes are used to categories items covered by the two reviewing databases, Mathematical Reviews (MR) and Zentralblatt MATH (Zbl).

If user knows the PACS or MSC code, He/She can enter it into the search box. It will display subject term relevant with codes. Select relevant codes and click on **View Selected** to view search results of relevant code. User can also enter search term to find the relevant codes.

PACS/MS search

Enter a PACS/MS code description (e.g. spin*), or you can search for a PACS or MS code itself (e.g. 12.10).

4. Advanced Search

User can pre-filter their search by selecting title/abstract, author, affiliation, full text and PACS/MSC codes. Additionally search can be restricted by date range, subject and journal.

Searching Just One Field From Title/Abstract

Enter keyword(s) in the first text entry box. Select search field from drop-down menu and Click on **Search** button. For example: To search a string **Nanotechnology** in the title of article from the period 2006 to 2009, enter **Nanotechnology** in the first text entry box, select **Title/ Abstract** from drop-down box and then enter 2006 in **From text entry** box and 2009 in **to text entry** box as shown below:

The screenshot shows the IOPscience search page. At the top, there is a navigation bar with links: Home, Search, Collections, Journals, About, Contact us, My IOPscience. Below this is a search bar with the text "Enter Search Terms". The search criteria are: "Nanotechnology" in the search box, "Title/Abstract" in the search field dropdown, "All Dates" in the date range dropdown, and "From 2006 to 2009" in the date range input fields. A "Search now" button is visible. Below the search bar, there are two columns of filters: "Subjects" and "Journals". The "Subjects" column lists various physics topics with checkboxes. The "Journals" column lists various journals with checkboxes. A red box highlights the search criteria and date range fields. A blue box with white text "Select Criteria Related to Search" points to the search criteria. Another blue box with white text "Limit The Search By Date Range" points to the date range fields.

Use logic operators AND, OR and NOT to define the relationship between search terms. User can also structure their search by using parentheses e.g. (stress OR strain) AND function. Example given below will search all articles on "Microscopy" And "Electron" in Title or abstract.

The screenshot shows the IOPscience search page with a Boolean search query. The search criteria are: "\"microscopy\" and \"electron\"" in the search box, "Title/Abstract" in the search field dropdown, and "All Dates" in the date range dropdown. A "Search now" button is visible. Below the search bar, there are two columns of filters: "Subjects" and "Journals". The "Subjects" column lists various physics topics with checkboxes. The "Journals" column lists various journals with checkboxes. A red box highlights the search criteria and date range fields. A blue box with white text "Use Boolean Operator" points to the search criteria. Another blue box with white text "Select Subjects/Journals to Limit Your Search" points to the filter sections.

Search Results

The screenshot given below gives the search result of the previous query, which will return three sets of results, to expand research scope even further:

1. Search results under Search tab contain regular peer-reviewed content from IOP science.
2. e-prints provide search result from eprintweb.org, which is a free e-print service based on Cornell University's arXiv.org.
3. News and analysis provides result from IOP's community websites

Filter Search

User can drill down further by expanding each filter category such as PACS code, date, subject, journal and author. Enter a further full-text search term within initial set of results to refine search.

Manage Search Results

1. **Save your search results:** You can save your search to re-run at a later date, and set up an RSS feed or e-mail alert to notify you of new results that meet your search criteria.
2. **Export selected results:** User has an option to export/email all or selected results in a variety of formats to their mail box.
3. **Tag this article:** User can Tag any article for future reference.

A user can access the full text articles in PDF or HTML format and also access the abstract of the articles or references.

Abstract
We report the grain size effect of hole-doped cobaltite, $\text{La}_{0.88}\text{Sr}_{0.12}\text{CoO}_3$, where average sizes are varied from ~ 35 to ~ 240 nm. The bulk compound is a cluster-glass (CG) compound composed of short range ferromagnetic (FM) clusters embedded in the spin-glass (SG) matrix at low temperature. The short range FM clusters are still retained in the nanocrystalline compound with average size ~ 35 nm which are associated with the SG component, displaying CG-like spin dynamics at low temperature. The exchange bias (EB) effect manifested by the shifts in the hysteresis loop is observed due to the field cooling where EB effect is weakened systematically with decreasing grain size. The decrease in the fraction of the FM component is found to be correlated with the weakening of the EB effect with decreasing grain size. Interestingly, the signature of the EB phenomenon due to the field-cooled effect is also

MY IOP Science

A user is required to create an account and obtain username and password to use the services of My IOP Science, mentioned below:

1. Email Alert

A user can subscribe to e-mail alerts to get periodic emails with links to new content automatically when new article are published. It also provides option to change the preference or delete the alert.

The screenshot shows the 'My Alerts' section of the IOPscience website. At the top, there are navigation links: 'Home', 'Search', 'Collections', 'Journals', 'About', 'Contact us', 'My IOPscience', 'Authors', 'Referees', and 'Librarians'. Below the navigation, there is a section titled 'My IOPscience' with a sub-header 'My Alerts'. A blue box with white text says 'Set up and Update Your Email Alerts'. Below this, there are two alert settings. The first is for 'Journal of Physics A: Mathematical and Theoretical' with a frequency dropdown set to 'Weekly' and a 'Delete' button. The second is for a saved search with the field 'Title/Abstract: "microscopy" and "electron"' and a date '24/03/2010 06:10:25', with a frequency dropdown set to 'Weekly' and a 'Delete' button. A red box highlights the 'Update' button at the bottom right of the second alert setting.

2. Tagged articles: User can Tag articles of interest, view all the articles that have labeled with that tag or remove any articles.

3. My searches: A user can save the search in My searches for future use, so that he/she can return to it and rerun it or set up the alerts.

4. Downloads: View articles that have been downloaded in the last three months.

The screenshot shows the 'My IOPscience article tags' section of the IOPscience website. At the top, there are navigation links: 'Home', 'Search', 'Collections', 'Journals', 'About', 'Contact us', 'My IOPscience', 'Authors', 'Referees', and 'Librarians'. Below the navigation, there is a section titled 'My IOPscience' with a sub-header 'My IOPscience article tags'. A blue box with white text says 'Tag Articles of Interest to You, Represented as a Tag Cloud.' Below this, there is a tag cloud with the tag 'xiao yujiang' highlighted in a red box. Below the tag cloud, there are two sections: 'View Articles That You Have Downloaded in the Last Three Months' and 'Save Your Searches from Previous Results and Set up Alerts or Run Your Saved Searches Again to Find New Results'. A red box highlights the 'Tagged Articles' link in the navigation bar. A red box highlights the 'Downloads' link in the navigation bar. A red box highlights the 'Your last 10 viewed' link. A red box highlights the 'Your last 10 searches' link. A red box highlights the 'Tagged Articles' link. A red box highlights the 'View Articles That You Have Downloaded in the Last Three Months' link. A red box highlights the 'Save Your Searches from Previous Results and Set up Alerts or Run Your Saved Searches Again to Find New Results' link. A red box highlights the 'Tagged Articles' link.
